What Braswell's Can Provide for You

- Recipe creation and custom product development.
- Professional research and development staff, including chemists and registered nutritionists, with experience in Good Manufacturing Practices, HACCP and third party audits.
- State and Federally inspected.
- Certified testing by Microbac and Siliker.
- Flexible production run capabilities to accommodate the needs of small start-up businesses as well as large volume customers.
- Small batch production processes ensures the highest level of consistent quality.
- High volume equipment to ensure keeping costs down and on time delivery.
- Complete product sourcing: labels, caps, glass, boxes and ingredients.
- For almost 70 years Braswell's has been a proven valuable resource for the private label/co-packing needs of thousands of businesses.

Quality Assurance

Our staff of QA/QC technicians ensures the highest quality of each product we pack. In addition to the wide range of safety and quality checks that are standard process for each production run, we offer: Extensive product sampling, testing and documentation. • In house food safety laboratory that allows on-site shelf life, microbiological, quality control and nutritional analysis testing. • Routine and random inspections. • Comprehensive quality program including sanitation, GMP's, SOP's, HACCP, allergen program, label review, etc. • Inspected by Georgia Department of Agriculture and FDA. • **SQF 2000** Level 2 Certified HACCP based Food Safety Plans.

Private Label Production

Our Label Production Department features a full time staff of skilled technicians who make label design, compliance and production a fast and easy process. Braswell's is a private label source for some of the biggest brands in the food industry and we are ready to work for you.
